## ABSTRACT

2

3        This invention relates to the diagnosis and treatment of cancerous diseases,  
4        particularly to the mediation of cytotoxicity of tumor cells; and most particularly to the  
5        use of cancerous disease modifying antibodies (CDMAB), optionally in combination  
6        with one or more chemotherapeutic agents, as a means for initiating the cytotoxic  
7        response. The invention further relates to binding assays which utilize the CDMABs  
8        of the instant invention.
